

USER MANUAL

Hospital Management System

A Complete Guide for Patients, Doctors, Receptionists, Pharmacy Staff, and Administrators

This manual explains how to use every part of the A4 Medical Consortium system from your own point of view — how to log in, book an appointment, write a prescription, manage users, record a sale, and everything in between. No technical background required.

1. Getting Started

A4 Medical Consortium's Hospital Management System is a single website that every kind of user — patients, doctors, receptionists, pharmacy staff, and administrators — logs into. What you see after logging in depends entirely on your role: a patient sees appointment booking and their own bills, while a doctor sees their patient list and prescription tools. This manual walks through each of those views in turn.

Creating an Account

Anyone can create an account from the public website's **Sign Up** page (reached via the "Register" link on the login page).

- 1 Go to the Sign Up page and fill in your name, email address, phone number, and a password.
- 2 Choose your role. **Patient** accounts are approved immediately — you can log in right away. If you are registering as a **Doctor**, **Receptionist**, or **Pharmacy** staff member, your account is created but marked *pending* until a hospital administrator reviews and approves it.
- 3 Submit the form. Patients are taken straight to the login page. Staff applicants see a message confirming their account is awaiting approval.

Why the wait for staff accounts? Doctor, receptionist, and pharmacy accounts have access to patient records and hospital operations, so an administrator must confirm the person is genuinely hospital staff before the account can be used. You'll see this same message if you try to log in before you've been approved. Contact the hospital's admin team if approval is taking longer than expected.

The Sign Up page — available to anyone from the login screen.

Logging In

- 1 Go to the Login page and enter the email and password you registered with.
- 2 Click **Log In**. You'll be taken straight to your dashboard.

The login screen — the entry point for every role.

Signing In with Google

If your email address is already registered in the system, you can skip typing your password entirely by clicking the **Google** button on the login page and choosing your Google account. This

only works if:

- An account already exists in the system using that exact email address, and
- If that account is a staff role (doctor, receptionist, or pharmacy), it has already been approved by an administrator.

If neither condition is met, you'll be sent back to the login page with a message explaining why (no matching account, or still pending approval).

Forgot Your Password?

- 1 On the login page, click **Forgot password?**
- 2 Enter the email address on your account and submit.
- 3 Check your email for a reset link. For your security, the link expires after 60 minutes.
- 4 Follow the link to the Reset Password page and choose a new password. It must be at least 8 characters and include both an uppercase and a lowercase letter and a number.
- 5 Once submitted, you'll see a confirmation and can log in immediately with your new password.

Requesting a password reset link.

Tip: If you don't receive the email within a few minutes, check your spam folder. The reset link only works once — if it's expired or already used, simply request a new one.

Finding Your Way Around

Once logged in, every role sees the same basic layout:

- **Sidebar (left):** your role-specific menu — this is the main way you move between sections of the system. It collapses to a slide-out menu on smaller screens.
- **Top bar:** shows which dashboard you're in, a light/dark mode toggle, and your name and avatar on the right.
- **Main area:** the page you're currently viewing.

Every role also has three items at the bottom of the sidebar that work the same way for everyone: **Profile**, **Settings**, and **Support**, plus a **Logout** link. These are covered in Section 7.

2. For Patients

Book appointments, view prescriptions, and manage your care — all in one place.

Your Dashboard

After logging in, your sidebar gives you access to: **My Appointments**, **Prescriptions**, **Book Appointment**, **Pharmacy**, **Bills & Receipts**, and **Medical Reports**, alongside the shared Profile, Settings, and Support links every role has.

Your dashboard immediately after logging in.

Booking an Appointment

- 1 Click **Book Appointment** in the sidebar.
- 2 Under **Choose a Specialist**, select the doctor you want to see. Each card shows the doctor's name and specialization.
- 3 Pick a date and time under **Date & Time**.
- 4 Under **Reason for Visit**, tap one of the quick options (Regular Checkup, Blood Pressure Test, Vaccination, and so on) or type your own description in the free-text box.
- 5 Click **Confirm Appointment**. You'll see a success message and be taken to My Appointments, where your new appointment appears with a status of *Pending* until the

hospital confirms it.

The screenshot shows the 'Book Appointment' page of the A4 Medical app. On the left is a dark green sidebar with navigation options: 'My Appointments', 'Prescriptions', 'Book Appointment' (highlighted), 'Bills and Receipts', 'Medical Records', 'Profile', 'Settings', 'Support', and 'Logout'. The main content area is titled 'Book Appointment' with the subtitle 'Select your preferred doctor and schedule your visit.' It features a 'Choose a Specialist' section with four doctor cards: Dr. John Smith (Neurology), Dr. Kabir Fadillah (Cardio Thoracic), Dr. Dr Test Doctor (General), and Dr. Essence Alaba (Gynaecology). Below this are two sections: 'Date & Time' with a date input field (dd/mm/yyyy) and a time input field, and 'Reason for Visit' with buttons for 'Regular Checkup', 'Blood Pressure Test', 'Vaccination', 'Symptom Discussion', 'Follow-up', 'Emergency Consultation', and 'Prescription Renewal'.

Booking an appointment — choose a doctor, then a date and time.

Managing Your Appointments

The **My Appointments** page lists every appointment you've booked, each shown as a card with the doctor's name, specialty, date, time, and status (Pending, Confirmed, or Cancelled).

- Click **View Details** on any appointment card to see its full information, including the reason for the visit.
- Use the icons on each card to reschedule or cancel an appointment, if the hospital's policy allows changes at that stage.

Your upcoming and past appointments, one card per booking.

Viewing Your Prescriptions

Any prescription a doctor writes for you appears on your **Prescriptions** page — the medication name, quantity, dosage instructions, frequency, and duration are all listed, along with the date it was issued and which doctor prescribed it. You can download or print a copy directly from this page to take to the pharmacy.

Prescriptions written for you, with full dosage details.

Bills & Receipts

The **Bills & Receipts** page shows every invoice raised against your account — consultations, tests, and medication — along with its payment status. Paid invoices have a downloadable receipt attached.

Your invoices and receipts.

Requesting a Medical Report

If you need an official copy of your medical history — for travel, insurance, or a referral to another hospital — use the **Medical Reports** page.

- 1 Click **Medical Reports** in the sidebar.
- 2 Select the date range the report should cover.
- 3 Enter the reason for your request.
- 4 Submit. An administrator reviews the request and will approve or reject it — you'll see the outcome (and the reason, if rejected) reflected on this same page.

Requesting an official copy of your medical history.

3. For Doctors

Your schedule, your patients, and your prescriptions — organized in one dashboard.

Your Dashboard

Your sidebar gives you: **Overview**, **Schedule**, **My Patients**, **Prescriptions**, and **Medical Records**. The Overview page is your landing page and summarizes today's appointments and recent activity at a glance.

Your Overview page — a summary of today's activity.

Your Schedule

The **Schedule** page lists your upcoming appointments in order, with each patient's name, the reason for the visit, and the appointment time. Use this page to see what your day (or week) looks like at a glance.

Your appointment schedule.

Your Patients

The **My Patients** page lists everyone you've treated or have an upcoming appointment with. Selecting a patient opens their record, where you can review their visit history before an appointment.

Your patient list.

Writing a Prescription

The **Prescriptions** page shows every prescription you've issued and lets you write new ones.

- 1 Click **New Prescription**.

- 2 Select the patient from the **Patient** dropdown.
- 3 Under **Drugs**, search for and select a medication — its price and the pharmacy's current stock level are shown as you type.
- 4 Set the quantity, then fill in **Frequency** (e.g. "Twice daily"), **Duration** (e.g. "7 days"), and **Dose** (e.g. "1 tablet"). The frequency and duration fields offer autocomplete suggestions as you type.
- 5 Click **Add another drug** if the prescription covers more than one medication.
- 6 Add any **Special Instructions** for the patient (for example, "Take after meals, avoid alcohol").
- 7 Click **Issue Prescription**. It appears immediately on the patient's own Prescriptions page and in your prescription history.

Your prescription history, with each drug's dosage and schedule.

Medical Records

The **Medical Records** page organizes patients into family folders (a household can share one hospital card), each containing individual patient files. From here you can:

- Open a family folder to see everyone registered under it.
- Open an individual patient's file to see their personal details, blood-work and lab information, next-of-kin details, and full visit history.
- Add a new visit record to a patient's file after seeing them, documenting the diagnosis, treatment, and any notes from the visit.
- Edit a patient's file or a visit record later if a correction is needed.

Medical records, organized by family folder and patient file.

4. For Receptionists

The front desk's view — appointments, patient records, and billing.

Managing Appointments

The **Appointments** page shows every appointment booked across the whole hospital, not just one doctor's. From here you can:

- Confirm a pending appointment once you've checked the doctor's availability.
- Reschedule an appointment if a patient calls to change their time.
- Cancel an appointment on a patient's behalf.
- Filter the list by doctor, date, or status to find a specific booking quickly.

Hospital-wide appointment management.

Medical Records & Patient Folders

Receptionists share the same **Medical Records** tool doctors use, which is how new patients get registered:

- 1 Click **New Family Folder** to register a new household — enter the family/folder name, phone number, and address. A hospital card number is generated automatically; you never need to type one in yourself.

- 2 Inside a folder, click **Add Member** to create an individual patient file for each family member, recording their name, date of birth, sex, and (optionally) fuller registration details like place of origin, occupation, blood group, and next-of-kin information.
- 3 If a family's details change (a new phone number or address, for instance), open the folder and click **Edit Folder** to update it — the hospital card number itself never changes.
- 4 A patient's own file can similarly be corrected at any time via the **Edit Profile** button on their file page.

Registering and managing family folders and patient files.

Bills & Receipts

The **Bills & Receipts** page is where invoices get created and payments recorded. Mark an invoice as paid once payment is collected at the desk (cash, card, or transfer), and a receipt is generated automatically for the patient.

Creating invoices and recording payments.

All Prescriptions

The **All Prescriptions** page gives you a hospital-wide view of every prescription any doctor has issued — useful for confirming a prescription's details when a patient arrives at the pharmacy counter without their printed copy.

Every prescription issued across the hospital.

5. For Pharmacy Staff

Recording sales and keeping the shelves stocked.

Recording a Sale

The **Sales Records** page is your main working screen, split into a **Today's Sales** tab and a **History** tab of previously closed days.

- 1 In the **Add Drug to Sale** box, start typing a drug name — matching medications appear with their current stock level and price.
- 2 Select the medication, adjust the quantity with the + / – buttons, and click **Add**.
- 3 The item appears in the sale list below, and **Today's Total Sales** at the top updates automatically. Repeat for every item in the sale.
- 4 When the pharmacy closes for the day, click **Close Today's Sale** to finalize the day's total and move it into the History tab.

Recording a sale — search, add, and the running total updates live.

Selling against a prescription: if a patient brings a doctor's prescription, you can look it up under **Prescriptions** in your sidebar to confirm the exact medication, dosage, and quantity before adding it to the sale.

Managing Inventory

The **Inventory** page lists every drug the pharmacy stocks, its current quantity on hand, and its unit price. Use it to:

- Check stock levels before promising a medication to a patient.
- Add newly received stock to update quantities.
- Add a brand-new drug to the catalog if the hospital starts carrying it.
- Update a drug's price if the hospital's pricing changes.

The full drug inventory with stock levels and pricing.

6. For Administrators

Running the system — user approvals, oversight, and system-wide records.

Managing Users

The **Users** page is the most important admin tool — it lists every account in the system, with each person's name, email, phone, role, join date, and last login.

- 1 **Approving staff accounts.** New doctor, receptionist, and pharmacy accounts appear with a "Pending" status. Click the three-dot **Actions** button on that user's row and choose **Approve Account** to activate it.
- 2 **Changing a role.** From the same Actions menu, pick a new role under **Change Role** to move someone between Admin, Doctor, Patient, Receptionist, or Pharmacy.
- 3 **Removing a user.** Choose **Remove User** from the Actions menu to delete an account entirely.

The screenshot shows the A4 Medical Admin Dashboard. On the left is a green sidebar with navigation links: Sales Records, All Users (selected), Schedules, Bills and Receipts, Profile, Settings, Support, and Logout. The main content area is titled 'User Management' with the subtitle 'Monitor and manage all system accounts'. It includes a search bar 'Search users by name or email...' and two dropdown menus for 'All Statuses' and 'All Roles'. Below is a table of user accounts:

#	USER DETAILS	ROLE	CONTACT	ACTIVITY	ACTIONS
01	James Bond james345@gmail.com	PATIENT	09023549312	Joined: 8/18/2026 Visit: 8/18/2026	⋮
02	Essence Alaba abarakaya@gmail.com	DOCTOR	09023456710	Joined: 8/18/2026 Visit: 8/18/2026	⋮
03	A4 Test Admin a4admintest@example.com	ADMIN	08077778888	Joined: 8/17/2026 Visit: Never	⋮
04	A4 Test Pharmacy a4pharmacytest@example.com	PHARMACY	08055556666	Joined: 8/17/2026 Visit: 8/18/2026	⋮

The full list of user accounts.

Clicking the three-dot button opens a small menu right next to that specific button — not floating somewhere else on the screen — so it's always obvious which user's row you're acting on, even in a long list. If you scroll the page while the menu is open, it moves together with the row it belongs to, rather than staying pinned in place while the table scrolls underneath it.

The Actions menu, anchored to the row it was opened from.

System Logs

The **Logs** page is an audit trail of activity across the system — logins, records created or edited, and other significant actions, each with a timestamp and the user responsible. Use it to investigate a question about who did what, and when.

A running audit trail of system activity.

Report Requests

When a patient requests an official copy of their medical history (Section 2), it lands on your **Report Requests** page for review.

- 1 Open a pending request to see the patient's name, the date range requested, and their stated reason.
- 2 Click **Approve** to generate and release the report, or **Reject** and provide a reason — the patient will see it on their own Medical Reports page.

Reviewing patient medical-report requests.

Schedules

The **Schedules** page gives you an overview of every doctor's appointment calendar hospital-wide, useful for spotting scheduling conflicts or gaps in coverage.

A hospital-wide view of doctor schedules.

7. Everyone: Shared Features

Regardless of your role, these four items always appear at the bottom of your sidebar and work the same way for everyone.

Your Profile

The **Profile** page shows your personal details as held by the system — name, email, phone, and role. Some fields can be edited directly here; changes that affect your official hospital record (for patients, this means your name or date of birth) may need to go through a receptionist instead.

The screenshot shows the 'Profile Center' page for a user named 'A4 Test Patient' with the role 'patient' and a green 'AP' badge. The left sidebar is dark green with the 'A4 Medical' logo and navigation links: 'My Appointments', 'Prescriptions', 'Book Appointment', 'Bills and Receipts', 'Profile' (highlighted), 'Settings', 'Support', and 'Logout'. The main content area has a header 'Profile Center' with the subtitle 'Manage your personal information and system details.' Below this is a profile card for 'A4 Test Patient' with a 'PATIENT ACCOUNT' badge, email 'a4rebrandtest@example.com', and phone '08000000000'. To the right is a 'General Information' form with fields for 'FIRST NAME' (A4), 'LAST NAME' (Test Patient), and 'PHONE NUMBER' (08000000000). A green 'Save Profile Changes' button is at the bottom right.

The Profile page — the same layout for every role.

Settings & Changing Your Password

The **Settings** page is where you change your password.

- 1 Enter your current password.
- 2 Enter a new password — it must be at least 8 characters, include an uppercase and lowercase letter and a number, and be different from your current password.
- 3 Confirm the new password and save.

Changing your password from the Settings page.

Getting Help & Reporting a Problem

The **Support** page is where you go if something isn't working right, or you just have a question about using the system. Describe the issue and submit it — this reaches the hospital's technical contact directly, so there's no need to email or call separately.

Reporting an issue or asking for help.

Dark Mode & Logging Out

The toggle in the top bar switches between light and dark appearance — this is a personal display preference and doesn't affect anyone else's view of the system.

To end your session, click **Logout** at the bottom of the sidebar. You'll be returned to the login page. For your security, always log out when using a shared or public computer.

A note on account security: never share your password with anyone, including hospital staff. If you suspect your account has been accessed by someone else, change your password immediately from Settings and let an administrator know.
